

Vacancy Production Employee (>24 hours)

About PATS

We are on a mission to reduce pesticides globally, and we are in a hurry! Come and work with our fun, versatile, and growing team on some truly smart innovations. We challenge you!

We are developing a variety of products that will change the way greenhouses protect their plants and vegetables from pest insects. These products range from smart cameras to agile hunting drones. Come and help build new prototypes and products.

Whether you are looking for a full-time or part-time position or a student job, feel free to apply!

What will you do?

- Help with a variety of tasks: production/assembly, 3D-printing, soldering, software configuring, testing, improving
- Work on various products and adapt priorities when deadlines need to be met
- If you like to go out of the office sometimes, join us deploying prototypes for field-testing (day and night) in the greenhouses!

Who we are looking for:

- Available for at least 24 hours per week
- Minimum period of two (2) months
- Good command of Dutch or English language
- Experience with 3D-printing, soldering and working with PCBs is an advantage

What we offer:

- A suitable salary
- Flexible working hours
- Lots of freedom and room for your initiative
- A vibrant, innovative and collaborative work culture
- A chance to shape the future of sustainable agriculture
- Start-up life. But also drones that play Star Wars

Enthusiastic? Are you available for at least 24 hours a week? Then apply immediately and send your CV and brief motivation to working@pats-drones.com. We will invite you to our office in Delft for a first meeting.
