

# Installation guide Trap-Eye™ gateway

## STEP 1.

### PREPARE THE TRAP-EYE™ GATEWAY FOR INSTALLATION

- Pick a location to install the system ~1,5 metres above the crop. If 1,5 metres is not possible, try to put the Trap-Eye™ gateway as high as possible.
- Unscrew the screw from the metal profile.
- Slide the metal profile through the opening on the back of the Trap-Eye™ gateway.
- Open the Trap-Eye™ gateway by opening the top from the back.
- Attach the Trap-Eye™ gateway to the metal profile using the screw and a screwdriver.
- Close the Trap-Eye™ gateway.

## STEP 2.

### INSTALLATION OF THE TRAP-EYE™ GATEWAY

- Loosely attach the two hose clamps around the post.
- Slide the metal profile with the Trap-Eye™ gateway under the hose clamps.
- Tighten the two hose clamps to attach the Trap-Eye™ gateway to the post.

## STEP 3.

### POWER UP TRAP-EYE™ GATEWAY

- Plug the main power cable into the bottom and power up the Trap-Eye™ gateway.

## STEP 4.

### GET THE PATS INSTALL APP READY FOR USE

- Download the PATS Install app from the Google Play Store (only on Android) or by using the QR code.
- Allow the PATS Install app access to your GPS and camera.
- Log into the PATS Install app with your PATS credentials.

## STEP 5.

### LOG THE LOCATION OF THE TRAP-EYE™ GATEWAY

- Open the PATS Install app.
- Optional. If you have multiple locations: choose your greenhouse from the list
- Input the row/line and post number.
- Press the 'scan' button and wait for the camera to open.
- Scan the QR code on the Trap-Eye™ gateway.
- If a mistake is made, re-enter the location info and re-scan the QR-code (the information will be over-written).

## STEP 6.

### CHECK THAT THE SYSTEM IS WORKING

- Check if the power LED at the bottom of the Trap-Eye™ gateway is on (colour should be static yellow or green).
- If the light is off, make sure all cables on the power board and the mini-PC are inserted correctly.
- Close the Trap-Eye™ gateway.
- Your gateway is ready to connect with the Trap-Eye™ devices!
